

# ISOTANK – 20'

## REGULAR 24 TM BULK SUPPLY

### PRODUCT QUANTITY

The supply by Isotanks allows to deliver volumes of additives between 20,000 and 24,000 liters.

### DISTANCE

The delivery of additives by Isotanks is suitable for regular supplies in bulk by sea to destinations close to the Iberian Peninsula, such as the Canary Islands or North Africa. Also for long distance inland supply by train (Europe)

### TRANSIT TIME

The transit time of the additives shipped in isotanks to the destinations listed above is approximately one week to the final destination port.

### TRANSPORT

The delivery of additives by flexitanks is available for transport::

- ✦ Sea – 20' Ship containers
- ✦ Land – Intermodal/Train

### ADVANTAGES

- ✦ High chemical stability, allowing 100% compatibility with the product. Also valid for cargo classified as ADR.
- ✦ Logistical cost-effective way for sea/train transportation (€/Tm).
- ✦ Maximum use of space for a 20' ship container.
- ✦ Reusable Tank Containers. No solid waste generation. Low environmental footprint.
- ✦ Easy loading and unloading. Minimum handling cost in factory.
- ✦ Safe transport method, without risks of product losses.

***Isotank is a tank made of stainless steel, similar to conventional tank trucks, with the exception of allowing intermodal (train) and sea transport of the cargo, optimizing the logistical cost-effectiveness of grinding aids sea/train transportation.***
